CAMBRIDGE INTERNATIONAL EXAMINATIONS GCE Ordinary Level

MARK SCHEME for the October/November 2012 series

5038 AGRICULTURE

5038/11

Paper 1, maximum raw mark 90

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2012 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

		GCE O LEVEL – October/November 2012	5038	
			6	
Ма	ırk schemes m	nay use these abbreviations:	Alt.	
•	;	separates marking points	Total Total	
•	/	alternatives	1.6	
•	®	reject		1
	^			

Mark schemes may use these abbreviations:

Α accept (for answers correctly cued by the question)

(I) ignore

AW alternative wording (where responses vary more than usual)

AVP additional valid point (where there are a variety of possible additional valid

answers)

<u>underline</u> actual word given must be used by candidate (grammatical variants excepted)

D, L, T, Q quality of drawing / labelling / table / writing as indicated by mark scheme

indicates the maximum number of marks that can be given max

equivalent eq

ORA or reverse argument

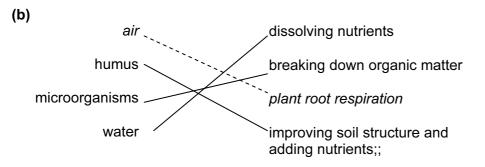

IDEA OF where candidates are expected to make an argument which expresses a particular

idea, but the ways in which they will do this will be many and varied

ref. explained reference to

italics introductory statements or additional comment on the marking points

		GCE O LEVEL – October/November 20	5038	700
1		us, B – silt, C – sand, D – gravel orrect = 3, three correct = 2 , 1 or 2 correct =	:1	Cambridge
	(b)	airdissolving nutrien	ts	COM

(c) increases availability of (some) minerals; A reference to promoting soil microorganisms (bacteria)

[Total: 6]

- 2 (a) C, A, B; in that order
 - (b) named crop e.g. maize appropriate fertiliser; e.g. FYM appropriate timing; e.g. in seedbed, shortly after sowing correct signs; e.g. 'milk stage', drying/browning of silks

(c) pollen from anther to stigma; agent e.g. wind; fertilisation detail e.g. pollen tube / fusion of gametes or nuclei / development of seed / fruit;

[Total: 7]

- 3 (a) D between ammonium compounds and nitrogen in air;
 - **P** between dead organic matter and ammonium compounds;
 - N between ammonium compounds and nitrates;

[1]

- (b) (i) root crops, legumes, cereals; in that order
 - (ii) nitrogen fixing bacteria in root nodules; [2] can improve nitrogen levels in soil;
 - (iii) reduces pest / disease build up in soil / reduces need for pesticides / better utilisation of minerals / AVP; [1]

[Total: 7]

		9-	'	GCE O LEVEL – October/November 2012	5038
4	(a)	osn	nosis;	;	Syllabus 5038 A Day Cannibridge
	(b)	(i)		ect label; tall cells with chloroplasts near top of secti ect label; cells in the lower part of the vascular bund	on le [2]
		(ii)	guar R ste	rd cell; coma	[1]
	(c)) loss of water vapour / evaporation (mostly) through stomata; concentration gradient across leaf air spaces / mesophyll; draws water up through xylem;			
				by temperature / humidity / air movement;	[max 3]
	(d)		k cuti wilting	icle / reduced surface area / narrow leaves / surface	hairs / AVP; [1]
					[Total: 8]
5	(a)	A;	cove	ering all stores of food	[1]
	(b)	В;	cont	tagious	[1]
	(c)	(i)	loss abno	er / temperature; of appetite; ormal behaviour; lesions;	
				harge from eyes / nose / mouth; abnormal urine / fac	eces; [max 2]
		(ii)	seek	ate animal; k veterinary advice; accination	[2]
	(d)	(i)		ks need warmth; o provides warmth in place of hen;	[2]
		(ii)	befo	vides immunity/protects from disease; ore immune system is fully developed; ference to named disease for second mark	[2]
					[Total: 10]
6	(a)	(i)	rume	en;	[1]
		(ii)	dige	est cellulose;	[1]
		(iii)	abor	masum;	[1]

	Pa	ge 5	5	Mark Scheme	Syllabus
		J		GCE O LEVEL – October/November 2012	5038
	(b)	(i)	oeso sma		Syllabus 5038 TARROCARMANANA
		(ii)	sma	ble / single chamber stomach in non-ruminant / 4 par Il intestine in non-ruminant; wer must make clear to which system it refers	rts in ruminant stomach / longer [1]
((c)	def	oresta	ation;	[1]
((d)	(i)	C ; a	bout nine times more	[1]
		(ii)	bact	erial action in rumen produces methane / AW;	[1]
					[Total: 9]
7	(a)	A;	incre	ease in population	[1]
	(b)	(i)	arab	ole;	[1]
		(ii)	no ir	ole because ncrease in costs but likely increase in sales receipts plausible case made for other enterprise	/ gross margin / profits; [1]
	((iii)	<i>poul</i>	try / egg production because it is very small so feed costs may neutralise increase	ed price for eggs / AW; [1]
	((iv)	labo	our / water / other utility / transport / machinery;	[1]
					[Total: 5]
8	(a)			allele observable characterist individual reproductive cell that fur another in fertilisation an alternative form of a structure in the nucleus carrying genetic informatics.	ses with gene of a cell
		all	corre	ct = 2, one or two correct = 1 mark	[2]

(b) (i) all contain black allele which is dominant;

[1]

Page 6	Mark Scheme	Syllabus	.43
	GCE O LEVEL – October/Novemb	er 2012 5038	100
(ii) corr	ect cross with suitable alleles, e.g.		Cally
	Bb × Bb;	correct cr	ross Mil
gametes	B b B b:	labelled or indicated by circl	e(b)
3 *******		,	

offspring

A correct Punnet squares correct links and value brown rabbits 25%;

[3]

[2]

[2]

- (c) (i) 8;; A 1 mark for correct method if answer wrong
 - (ii) rabbits are being suckled / feeding on milk from mother; [1]
- (d) body mass increase steady but food intake blip at week 5 or 6; change in body mass larger than amount of food intake; use of figures to illustrate; ignore both increase

[Total: 11]

- 9 (a) (i) A; control of pests [1]
 - [1] (ii) C; improved ventilation
 - stronger / will withstand, larger / heavier, animals; [1]
 - (iv) easier to clean / AVP; [1]
 - (b) direction of prevailing wind; orientation to sun; distance from farm house; nearness to water supply; ground conditions; accessibility to road / pasture; AVP; [max 3]

[Total: 7]

Page 7	Mark Scheme	Syllabus	. A
	GCE O LEVEL – October/November 2012	5038	100

Section B

10 (a) hard crust;

on soil surface;

caused by heavy rain / compression by heavy machinery;

max 3

(b) wind carries particles;

which abrade rocks;

temperature changes / heating and cooling;

cause expansion and contraction;

results in cracking/breakdown of rock;

water freezing in rock/cracks;

expansion causes breakdown;

moving water carries particles;

which wear away rocks;

carries particles to other areas (forming soil there);

[max 6]

(c) large particles;

above 0.05mm; A 2.0 - 0.02

large air-spaces / well aerated;

good drainage / poor water holding;

easily leached / eroded;

lacks nutrients / low in organic matter / inert;

light / easy to work;

quick to warm / cool;

[max 6]

[Total: 15]

11 (a) arable and livestock farming;

on one/the same farm;

[2]

(b) use of natural fertilisers / plant and animal manures; ORA not artificial fertilisers no use of growth promoters / hormone sprays;

R chemicals unqualified

use of crop rotation / rotation of livestock and crops;

to maintain soil fertility;

to control pests / diseases;

pest control using / biological control; ORA not pesticides

cultural methods;

ref. to standards laid down by national / international organisations;

requirement to preserve soil quality / structure;

[max 5]

Page 8	Mark Scheme	Syllabus	.0
	GCE O LEVEL – October/November 2012	5038	823

(c) against cost qualified e.g. seed / plant sterile / can't save seed / availability;

environmental concern e.g. pollen crosses with wild plants / affects biod more herbicide used on weeds as plants resistant / no control / affects other plants resistant / no control / affects / affe

farmers crops; [max 2]

market resistance to produce;

ethical considerations;

disease organisms / pests evolve greater effectiveness;

unknown effects / allergies on consumption; [max 2]

for solve world food problem, qualified e.g.

higher yield;

alter to grow in wider climate; resistance prevents waste;

[max 2]

improve market quality e.g.

taste; shelf life;

improved nutritional value; environmental advantage e.g.

less pollution potential

cost of inputs reduced - less need for chemical control [max 2]

[max 8]

[Total: 15]

12 (a) animals housed / kept in feedlots;

forage cut / harvested / example;

carted / fed to livestock in fresh state;

[max 2]

(b) removal of bushes / unwanted trees;

fence:

soil preparation – plough; harrow; roll; fertilise;

[max 2]

sowing - seed rate; season of establishment (e.g. rainy season);

seed / plant mixture – suitable plants named;

[max 2]

inclusion of legumes;

irrigate;

weed control;

[max 7]

(c) difficult to control animals - harder to control mating;

to check on animals for disease/control parasites;

to ensure all receive correct ration;

may stray into crops;

[max 2]

animals more likely to be attacked by predators / stolen;

difficult to maintain pasture quality;

grazing inefficient / under grazed;

no selective grazing;

practice may result in soil erosion;

difficult to conserve forage;

[max 6]

[Total: 15]

				The same	
Page 9		ge 9	Mark Scheme	Syllabus	
			GCE O LEVEL – October/November 2012	5038	Day
13	(a)	life cycle e.g. egg egg deta	mplete metamorphosis;	[2] [max 4]	DaCambridge
		part of pl damage loss of sa wounds	provide entry for pathogens;	[max 3]	
		flight; already i lack of fie	depends on pest selected – could be infected material; eld hygiene; tural practice;	[max 2]	[max 8]
	(b)	weeding /use of re	s / practices when cultivating crops that break the life / early planting / clean planting material esistant varieties / ploughing to expose eggs or larva ation / burning;; (any 2)		[max 3]
	(c)	safe hard no pollut no dama reduction	c; t harm crop plant vest interval not needed; tion of environment; age to beneficial organisms; n of input costs; n for organic / environment friendly production		[max 4] [Total: 15]
14	(a)	-	young animal from mother; ner food provided by farmer;		[2]
	(b)	age of fe heat peri signs of mating d mechani	te in context of a named animal (but no mark available male at mating; iod detail; readiness for mating bulling / moist vulva; letails – male to female ratio; ics – erection / action of penis / duration;;	le for naming animal) [max 2]	
		sperm sv fertilisation	leposited in vagina; wim to egg; on is fusion of egg with one sperm; n oviduct;		[max 7]

GCE O LEVEL – October/November 2012 5038 (c) select best animals; for specific characteristic(s); example of suitable character;		1		
(c) select best animals; for specific characteristic(s); example of suitable character;	Page 10	Mark Scheme	Syllabus	
for specific characteristic(s); example of suitable character;		GCE O LEVEL – October/November 2012	5038	
select again for suitable animals; continue over a number of generations; use of inbreeding; explanation of line breeding;	for spec example select a continue use of i	cific characteristic(s); e of suitable character; gain for suitable animals; e over a number of generations; nbreeding;	Cambridge.com	

for specific characteristic(s); example of suitable character; select again for suitable animals; continue over a number of generations; use of inbreeding; explanation of line breeding; use of cross-breeding; explanation – hybrid vigour; use of AI; to gain rapid change / influence in herd;
