UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS **GCE Ordinary Level**

www.papacambridge.com MARK SCHEME for the May/June 2007 question paper

7094 BANGLADESH STUDIES

7094/02

Paper 2 (Environment and Development of Bangladesh), maximum raw mark 75

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

CIE will not enter into discussions or correspondence in connection with these mark schemes.

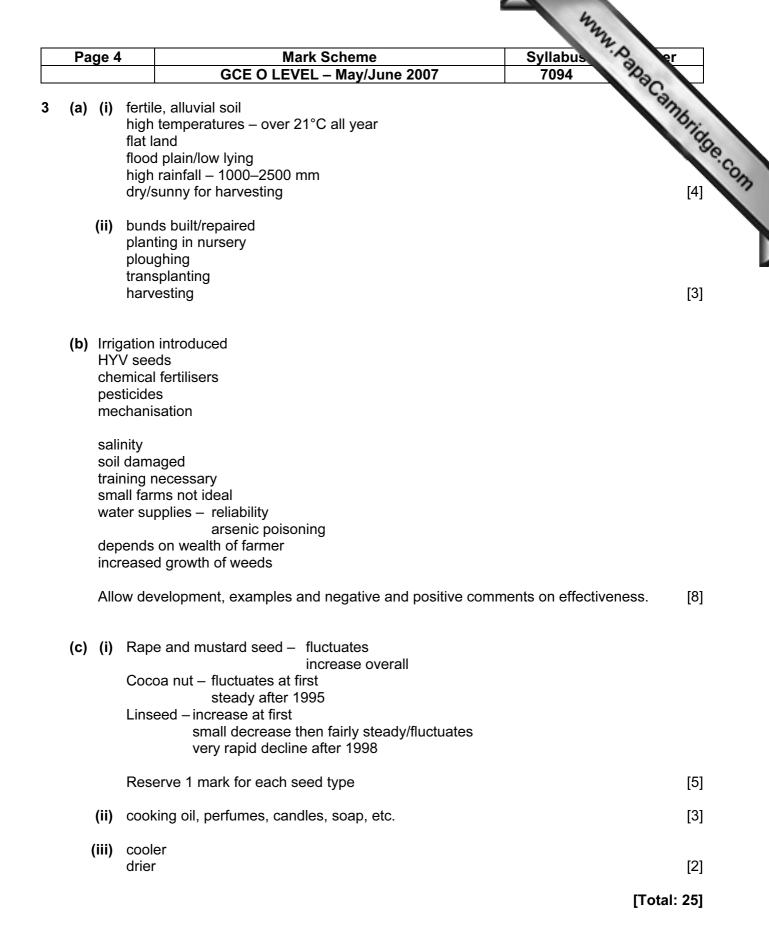

CIE is publishing the mark schemes for the May/June 2007 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2	2 Mark Scheme	Syllabus of er
	GCE O LEVEL – May/June 2007	7094
(a) (i)	high sea temperatures over 27°C low pressure converging air currents	Syllabus 7094 er 7094 ns cools
(ii)	warm, moist air rises rapidly/evaporation from ocea condenses/creation of latent heat cold air drawn inwards/in spiralling motion torrential/heavy rain cold air in centre sinks	ns cools [5]
(iii)	calm no rain clear skies	[3]
