

CAMBRIDGE INTERNATIONAL EXAMINATIONS GCE Ordinary Level

MARK SCHEME for the May/June 2013 series

5090 BIOLOGY

5090/32

Paper 3 (Practical Test), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

these abbreviation rates marking point natives ents of brackets are				ambridge.com
	ectly cued by the question, or guidance for examination examination (in the second s	miners)		× 1

Mark schemes will use these abbreviations

- separates marking points ; 0
- alternatives 0 1
- contents of brackets are not required but should be implied () 0
- R reject 0
- accept)for answers correctly cued by the question, or guidance for examiners) Α 0
- ignore (for incorrect but irrelevant responses) lg 0
- alternative wording (where responses vary more than usual) ĂW 0
- AVP alternative valid point (where a greater than sual variety of responses is expected) 0
- ORA or reverse argument 0
- underline actual word underlined must be used by candidate (grammatical variants excepted) 0
- indicates the maximum number of marks that can be given max 0
- statements on both sides of the + are needed for that mark + 0

uestion	Answer			Mark	Notes Photo	
(a)	add Benedic	ts/Fehlings sc	blution;			
	heat/warm/te	emp 60+;				
	blue to green/yellow/brown (qualified)/orange/red; safety – ref water bath/goggles					A pink to purple/blue to brown
					[max 3]	
(b)	time/mins	reducing su	gar test	starch test		One mark for each block.
	0	obs: blue/nc	change	brown		A no change for brown in the starch test.
		con: negativ	ve/ AW ;	negative/ AW ;		
	20	obs: green/y	/ello/orange/red	brown		
		con: positive	Э;	negative/ AW ;	[4]	
(c)	gradien 3. starch o 4. glucose 5. referend	her concentra	ve out;	[max 5]		
(d)	ileum/small intestine/cilus/ AW ; absorption of glucose/reducing sugar/smaller//soluble molecules; (into) blood (water);			[3]		
(e)	remove suga	ar solution/no	glucose in water	[1]		
					[Total: 16]

(a) (i)			universal indicator	рН		Paper 32 one mark for observation and pH check Supervisor's report	
	fresh milk yoghurt	yellov orang	v/green + je/red +	7 4	[2]		
(ii)	yoghurt: thick	er/creamy	+ milk: thinner/mo	re 'runny'	[1]	both materials needed or comparative terms used R rough/soft	
(b)	bacteria produce acids/reduces pH; acids change milk protein; milk becomes thicker/creamy in texture;				[max 2]	A tastes sour	
(c)	Spheres (circular, cylindrical) and rods (capsule-like, tubular, long); bacilli/cocci; some multiply/divide/have divided/ref mitosis				[max 2]	R if names are linked to incorrect shape A joined if qualified to imply division	
(d) (i)	 time on x axis + number on y axis; axes fully labelled; linear scales to fill at least half the grid; 			2. minimum <i>x</i> : t/hrs <i>y</i> : no. of bacteria/millions			
	 correct p clean ne 		d to ioin plots. smc	ooth curve through plots	[5]	 4. plots must be visible A x, +, dot or circled dot 5. R if extrapolated back to 0 if bar 	
(ii)				of toxic end product/acidity too	[0]	chart 2, 3. and 4. only R milk used up	

	Page 5	Mark Scheme GCE O LEVEL – May/June 2013	Syllabus 5090	Paper 32	apac
(e)	 same volume/source same mass/type of different temps (at left) temps identified with measure time taken repeat to obtain measure 	pacteria added; east two) identified; nin a suitable range; for yoghurt to form;	[max 4]	A at least 3 temperatures in the of 5–50 C. R amount/quantity of milk A amount/quantity/volume/nu mass of bacteria A rate/speed of yoghurt product taken for pH to reach 4	mber for
			[Total: 17]		
8 (a) (i)	4. stigma lower than a	ns (at least 9 cm) nd filaments with double line; nthers and wider than style; nen + stigma + style;	[5]	R if lines shaded elsewhere	
(ii)			[max 2]	A scent A honey guides	
			[Total: 7]		
			[40]
