INTERNATIONAL GCSE

MARKING SCHEME

MAXIMUM MARK: 100

SYLLABUS/COMPONENT: 0420/01, 0421/01, 7010/01

COMPUTER STUDIES Paper 1

Page	e 1	Mark Scheme		Sylla	o v
		IGCSE EXAMINATIONS – J	UNE 2003	0420, 042 7010	Day
				7010	an.
(	Generally,	one mark for each valid point.	Two examples gai	n two marks:	10
	produces a which is st meaningle	the elements of a block/bytes/s a single number/value ored with the block ss total	tring/instructions in	a program	o apa Campi
	e.g. hash t	otal			[2]
	relations by commo uses table	f files are linked/data held in a i n fields	number of interrela	ted files or	[2]
:	memory th and writter stores data directly ad	cess memory (RAM) at can be read from to/changed/altered a/programs dressable nporary memory			[2]
		own the problem/task/program oblems/smaller tasks/modules			[2]
	letters of the plus numb	eric characters ne alphabet (alphabetic) ers/digits 0 to 9 naracters, e.g. punctuation, +, ?	)		[2]

	vays <b>that learning and testing methods</b> have	e been affected:	Abrido.
learn	at own speed/pace	e been affected:	11dge
learn		e been affected:	stidge.co
learn learn	at own speed/pace	e been affected:	stidge.co.
learn learn learn	at own speed/pace ng using multimedia	e been affected:	stidge.co.

## Any two ways that learning and testing methods have been affected: learn at own speed/pace learning using multimedia learn any time learning/testing on-line can revisit the learning material automatically distance learning/no need to travel/learn at home on-line tutoring/conferencing diagnose gaps in student learning and provide appropriate material provide appropriate learning material for individual students after analysis no need to set aside rooms for exams less data entry/automatic marking can test more students as world wide easier for students with disabilities simulations/models allow students to see experiments etc. done learning from a CD [2]

3 (a) Two sensors from: light/infra red/PIR motion/movement pressure proximity level position (end of film) distance

(b) Two points from:

comparing with stored values calculation qualified named adjustment according to data received from sensor

Award marks for 2 sensors discussed or 1 sensor with two points discussed. Battery, end of film, pushing buttons is ok if explained.

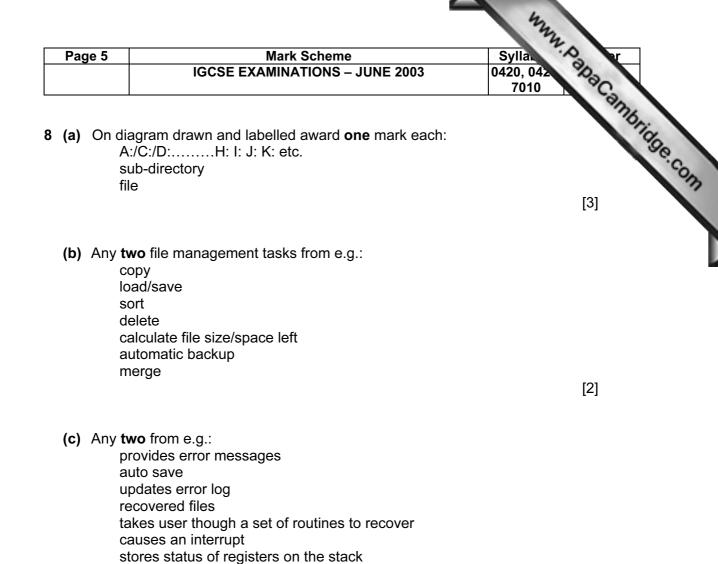

AC/DC = 0
