

**CANDIDATE** NAME

## UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS General Certificate of Education Ordinary Level

7010/01

October/November 2007

2 hours 30 minutes

* ===	CENTRE NUMBER			CANDIDATE NUMBER
0 2 5 9 2	COMPUTER S	TUDIES		o
6793*		swer on the Ques faterials are requ	·	

## **READ THESE INSTRUCTIONS FIRST**

Write your Centre number, candidate number and name on all the work you hand in. Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer all questions.

No marks will be awarded for using brand names of software packages or hardware.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [ ] at the end of each question or part question.

For Examiner's Use

This document consists of 20 printed pages.

Explain, with examples, the following **five** computer terms:

	2 plain, with examples, the following <b>five</b> computer terms:

**16** (a) Fuel economy for a car is found using the formula:

	The state of the s	
	Fuel economy for a car is found using the formula:  Distance Travelled (km)	
(a)	Fuel economy for a car is found using the formula:	1
	Fuel Economy = Distance Travelled (km) Fuel Used (litres)	70
	What would be the Fuel Economy of a car travelling 40 km on 10 litres of fuel?	1
	[1]	
(b)	The Fuel Economy for 1000 cars is to be calculated using the formula in Question <b>16(a)</b> .	
	Write an algorithm, using pseudocode or otherwise, which inputs the Distance	

Travelled (km) and the Fuel Used (litres) for 1000 cars. The Fuel Economy for each car

Fuel Economy for each car

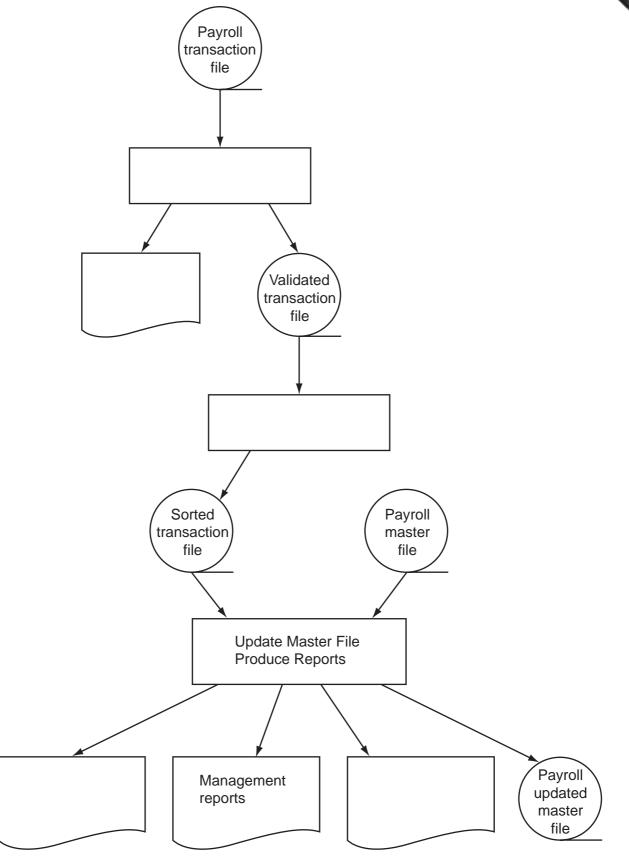

average (mean) Fuel Economy for all of the cars input

is then calculated and the following outputs produced:

- the best Fuel Economy (i.e. highest value)
- the worst Fuel Economy (i.e. lowest value)
