Paper 3 Alternative to Coursework

May/June 2013 1 hour 30 minutes

Candidates answer on the Question Paper.

No Additional Materials are required.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

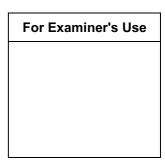

There is one compulsory question on this paper.

Each part must be answered in the space provided.

No marks will be awarded for using brand names of software packages or hardware.

You are advised to spend at least 20 minutes reading the information at the start of question 1 since this information is needed to answer all the sections in this question. All answers must refer to this information system.

The number of marks is given in brackets [] at the end of each part question. The maximum number of marks is 60.

This document consists of 12 printed pages.

In this question you are asked to read about:

- an existing manual, paper-based system for people to book a cruise.
- www.papaCambridge.com the web-based semi-automatic cruise booking system that is intended to be introduced as a replacement.

You are given a description of both the existing and the intended new web-based computerised system.

Description of the existing system

People wishing to book a cruise are sent a brochure with pictures and details of the cruises available. There is a plan of each cruise ship in the brochure showing all the cabins available. Each cruise ship has several sailing dates and different types of cabin. Each cruise has a unique brochure number. A 50% deposit is required when the cruise is booked; the remainder must be paid 10 weeks before the cruise is due to start.

When a person wants to book a cruise they select a cruise ship and sailing date from the brochure; then ring up the company to ask if there are cabin(s) available for the cruise chosen. The telephone booking line is open Monday to Saturday from 08:00 to 20:00 hours.

A plan showing all the cabins available on the cruise ship is kept for each cruise showing the cabins that have already been booked and those still available. If the cabin(s) chosen are available then the booking is agreed; if they are unavailable then any other cabins available for that sailing are offered as an alternative.

When the booking is agreed, the following details are **always** required:

- cruise brochure number
- number and types of cabins booked
- names of people in the cruise group
- details of person booking the cruise
 - name 0
 - address \cap
 - telephone number 0
 - email address \cap

The following **may** be required:

age of each child in the cruise group under 18

The plan of the cruise ship for that cruise is updated with the cabins marked as booked and payment for the deposit is taken using a credit/debit card over the telephone. A receipt for the deposit, confirmation of the booking and details of the cruise are posted to the person who has booked the cruise. The final payment is taken 10 weeks before the cruise is due to start.

2

Description of the proposed web-based system

www.papaCambridge.com The intention is to replace all the paperwork by introducing a web-based cruise booking system which will contain all the information described above. It will allow people to book their cruise online, process secure debit/credit card payments; receive receipts and other paperwork via email attachments.

The new cruise booking system will have a website that contains all the details that were available in the brochure. For each cruise, there will be a cruise ship cabin plan showing the cabins still available to book and the price of each cabin. There will be a search facility available so that cruises can be viewed by:

- cruise ship
- duration of cruise
- area of cruise
- price
- availability of cabins

In the new system, a person will use this website to choose a cruise. When the booking is confirmed and the deposit paid they will receive a receipt for the deposit, confirmation of the rental and details of the cruise via an email attachment. The final payment will be taken 10 weeks before the cruise is due to start.

A systems analyst is to be employed to review the existing manual method. The systems analyst will be responsible for drawing up an action plan for the new web-based system. This will then be designed, built, tested and implemented. Technical documentation will be produced. Six months after the introduction of the new system, a full evaluation of its performance will be made.

www.papaCambridge.com 4 1 (a) The systems analyst has decided to use project management software to pro Gantt chart to check the progress of this project. Give three reasons why the systems analyst decided to do this. Reason 1 _____ Reason 2 Reason 3 [3] (b) To gather information about the existing manual system, the systems analyst decides to use a questionnaire for the people booking a cruise. Explain why the method is appropriate in this case. _____ [2] State one other method that the systems analyst could use. [1]
