Paper 2 Structured Questions

May/June 2024

MARK SCHEME

Maximum Mark: 90

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2024 series for most Cambridge IGCSE, Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

This document consists of **29** printed pages.

PUBLISHED**Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptions for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

PUBLISHED**Social Science-Specific Marking Principles
(for point-based marking)****1 Components using point-based marking:**

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a** DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- b** DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- c** DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require *n* reasons (e.g. State two reasons ...).
- d** DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e** DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f** DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g** DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion).

2 Presentation of mark scheme:

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

3 Calculation questions:

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer.
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

4 Annotation:

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

PUBLISHEDCommon examiner annotations on 0455/2281/0987 and 2286

	Uncertain what the candidate means – an illogical line of thought			MAX
	Benefit of the doubt			Not answered question
	Blank page			Not established – a statement made without any support
	Caret – a word is missing			Repetition
	Confused			SEEN
	Cross			Tick – a credit worthy point
	Highlight Please do not use			Too vague
	Nothing creditworthy			To be used when a candidate has misidentified a question they have answered e.g.: This is an answer to Q4(c) and not Q5(c) .

Question	Answer	Marks	Guidance
1(a)	<p>Calculate Tunisia’s balance on the current account of its balance of payments.</p> <p>–\$2.4bn</p>	1	Accept –2.4bn. Also accept –6.8 or –6.9 billion TND.
1(b)	<p>Identify <u>two</u> qualities of a good tax that the Tunisian government aimed to achieve.</p> <p>Efficiency / efficient / the tax should improve market performance / reduce market failure (1). Economical / economy / the tax should raise more in revenue than it costs to collect it (1).</p>	2	If more than 2 qualities are given, consider the first 3.
1(c)	<p>Explain <u>one</u> reason why the Tunisian government regulates the price of flour and milk.</p> <p>Reduce poverty (1) flour and milk are basic necessities /essential products / people may be able to buy enough basic necessities / make them affordable / keep price relatively low (1). Or Prevent monopoly firms exploiting their market power (1) stop the firms raising price to a high level (1).</p>	2	One mark for a reason identified and one mark for an explanation.

PUBLISHED

Question	Answer	Marks	Guidance
1(d)	<p>Explain <u>two</u> ways the Tunisian government tried to reduce frictional unemployment.</p> <p>Logical explanation which might include:</p> <p>Increased the labour market information available to workers and employers (1) so workers would be more aware of job vacancies / skills and qualifications required / employers more aware of those seeking jobs / may enable workers to move more quickly/easily between jobs / reduce search time / increase mobility of workers (1).</p> <p>Did not raise unemployment benefit (in line with inflation) (1) so, the purchasing power of unemployment benefit would fall / increase the incentive to work (1).</p>	4	<p>One mark for each of two ways identified and one mark for each of two explanations.</p> <p>If more than 2 ways are given, consider the first 3.</p>

PUBLISHED

Question	Answer	Marks	Guidance
1(e)	<p>Analyse the relationship between the change in Tunisia’s average wage and the inflation rate.</p> <p>Relationship (up to 2 marks) Direct relationship / positive relationship (1) as change in the average wage increases so does the inflation rate / if change in average wage / rise in average wage falls so does the inflation rate / both fall and rose together / same trend (1).</p> <p>Evidence (up to 3 marks) 2016 – 2017 / 2018 both the average wage / change in average wage and inflation rate rose (1). Between 2014 – 2018, the average wage rose more rapidly than the inflation rate (1) real wages would have increased between 2014 – 2018 (1). Between 2018 – 2020 / in 2019 – 2020, the inflation rate was higher than the rise in the average wage (1) real wages would have fallen (1). Between 2014 – 2015/2016 / 2018 – 2019/2020 both the change in average wage and inflation rate fell (1). 2018 had the highest rise in the average wage and the highest inflation (1). 2016 had the lowest increase in the inflation rate but not the lowest increase in the average wage / 2020 had the lowest increase in the average wage but not the lowest inflation rate (1). Over the whole period the inflation rate rose while the increase in the average wage fell (1).</p> <p>Explanation (up to 2 marks) A rise in the average wage may increase costs of production / cause cost push inflation / a higher inflation rate will encourage workers to press for a wage rise (1). A rise in the average wage may increase disposable income / consumer expenditure / total demand / cause demand-pull inflation (1).</p>	4	<p>Responses do not have to be in the format suggested but they should address the expected/normal relationship, offer supporting evidence of that, highlight any exceptions to that, and analyse the overall data.</p> <p>Note: average wage did not fall.</p>

Question	Answer	Marks	Guidance
1(f)	<p>Analyse, using a demand and supply diagram, how an increase in wage costs would affect the market for shoes.</p> <p>Coherent analysis which might include:</p> <p>D&S diagram: Axes correctly labelled – price and quantity or p and q (1). Original demand and supply curves correctly labelled (1). New supply curve shifted to the left (1). Equilibriums – shown by lines P_1 and Q_1 and P_2 and Q_2 or equilibrium points marked as E_1 and E_2 (1).</p> <p>Written analysis: An increase in wage costs would increase costs of production which may raise price (1).</p>	5	<p>Note: higher price needs to be linked to higher costs of production/higher costs/higher wage costs.</p> 

Question	Answer	Marks	Guidance										
1(g)	<p>Discuss whether or not the Tunisian government should continue to subsidise electricity production.</p> <p>Award up to 4 marks for logical reasons why it might, which may include:</p> <ul style="list-style-type: none"> • reduce costs of producing electricity (1) increase supply of electricity (1) lower price of electricity (1) make electricity more affordable / reduce poverty (1) • lower costs of firms that use electricity (1) which may encourage them to expand / attract MNCs / increase output / increase GDP / cause economic growth (1) increase employment / lower unemployment (1) • reduce inflation / firms lower prices (1) make Tunisia's products more internationally competitive / increase exports / lower imports / improve the current account balance (1) • may reduce pollution / external costs (1) if subsidising green sources of energy (1). <p>Award up to 4 marks for logical reasons why it might not, which may include:</p> <ul style="list-style-type: none"> • electricity firms may rely on the subsidy (1) may not keep costs low / become inefficient (1) may not pass on the subsidy in the form of lower price (1) • opportunity cost (1) government could spend money on e.g. healthcare (1) • may result in a budget deficit / increase in taxes (1) • may cause pollution / external costs (1) if e.g. coal powered / deplete non-renewable resources (1). 	6	<p>Apply this example to all questions with the command word DISCUSS (1g, 1h, 2d, 3d, 4d and 5d)</p> <p>Each point may be credited only once, on either side of an argument, but separate development as to how/why the outcome may differ is rewarded.</p> <table border="1" data-bbox="1272 486 2027 1050"> <thead> <tr> <th data-bbox="1272 486 1877 552">Generic example</th> <th data-bbox="1877 486 2027 552">Mark</th> </tr> </thead> <tbody> <tr> <td data-bbox="1272 552 1877 617">Tax revenue may decrease...</td> <td data-bbox="1877 552 2027 617">1</td> </tr> <tr> <td data-bbox="1272 617 1877 715">...because of reason e.g. incomes may be lower.</td> <td data-bbox="1877 617 2027 715">1</td> </tr> <tr> <td data-bbox="1272 715 1877 850">Tax revenue may increase because incomes may be higher i.e. reverse of a previous argument.</td> <td data-bbox="1877 715 2027 850">0</td> </tr> <tr> <td data-bbox="1272 850 1877 1050">Tax revenue may increase because of a different reason i.e. <u>not</u> the reverse of a previous argument e.g. government spending on subsidies may stimulate the economy more than spending on education.</td> <td data-bbox="1877 850 2027 1050">1</td> </tr> </tbody> </table>	Generic example	Mark	Tax revenue may decrease...	1	...because of reason e.g. incomes may be lower.	1	Tax revenue may increase because incomes may be higher i.e. reverse of a previous argument.	0	Tax revenue may increase because of a different reason i.e. <u>not</u> the reverse of a previous argument e.g. government spending on subsidies may stimulate the economy more than spending on education.	1
Generic example	Mark												
Tax revenue may decrease...	1												
...because of reason e.g. incomes may be lower.	1												
Tax revenue may increase because incomes may be higher i.e. reverse of a previous argument.	0												
Tax revenue may increase because of a different reason i.e. <u>not</u> the reverse of a previous argument e.g. government spending on subsidies may stimulate the economy more than spending on education.	1

Question	Answer	Marks	Guidance
2(a)	Identify <u>two</u> possible opportunity costs of producing primary sector products. Secondary sector products / capital goods / manufactured goods (1) tertiary sector products / services (1) Wildlife habitats/quality of the ecosystem (1)	2	If more than 2 are given, consider the first 3.

PUBLISHED

Question	Answer	Marks	Guidance
2(b)	<p>Explain <u>two</u> policy measures which may reduce poverty.</p> <p>Logical explanation which might include:</p> <p>Introduce / increase minimum wage (1) help low-paid workers / raise income of low-paid workers (1). Provide state benefits (1) e.g. unemployment benefit can enable those who have lost their jobs to purchase basic necessities (1). Reduce indirect taxation (1) tax on goods and services tends to fall more heavily on the poor (1). Provide education / training (1) increase earning potential / income / employment opportunities (1). Job creation schemes / increase jobs in the public sector (1) e.g. expanding state-owned firms / increase employment / raise incomes / subsidising private sector firms (1) lower prices (1). Reduction in interest rate / expansionary monetary policy (1) encouraging firms to expand / take on more workers (1). Increase in government spending (1) increase employment opportunities (1).</p> <p>Reduce direct taxation / expansionary fiscal policy (1) which may encourage firms to expand and take on more workers / increase disposable income (of the poor) (1). Progressive taxes (1) reduce relative poverty (1). Provide job information (1) reduce frictional unemployment (1). Introduce a maximum price (1) to make necessities more affordable (1).</p>	4	<p>One mark each for each of two policy measures identified and one mark for each of two explanations.</p> <p>If more than 2 policy measures are given, consider the first 3.</p> <p>Explanation marks e.g. reduce unemployment can be given without identification of policy measure as a candidate may write e.g. use a policy measure that will reduce unemployment.</p>

PUBLISHED

Question	Answer	Marks	Guidance
2(c)	<p>Analyse how the closure of firms may harm consumers.</p> <p>Coherent analysis which might include:</p> <p>May reduce competition (1) increase monopoly power / market share (1) may result in higher prices (1) may not innovate / spend on R&D / become inefficient / complacent (1) lower quality (1) slower to respond to changes in consumer demand (1).</p> <p>May mean that consumers have to travel further to purchase products (1) may take time to find alternatives (1) there may be a reduction in the range of products available / less choice / less variety (1) lower quantity / it may not be possible to buy some products (1).</p> <p>May reduce consumer confidence (1) lowering quality of life / reduce consumer welfare / living standards (1).</p> <p>May reduce external economies of scale (1) example (1) raise average cost (1) which may raise price (1).</p>	6	<p>Focus should be on consumers.</p> <p>One mark in total for higher price.</p>

Question	Answer	Marks	Guidance												
2(d)	<p>Discuss whether or not a government should encourage people to walk to school and work.</p> <p>In assessing each answer, use the table opposite.</p> <p>Why it might:</p> <ul style="list-style-type: none"> • may make people healthier • may raise productivity • may reduce healthcare costs • may reduce pollution and traffic congestion • may be less need for car parking space. <p>Why it might not:</p> <ul style="list-style-type: none"> • may not be safe • may make people late • may increase stress and lower productivity • may reduce demand for bus and train use • may cause some bus and train drivers to lose their jobs • may restrict job choice due to distance from home. 	8	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th data-bbox="1267 213 1384 279">Level</th> <th data-bbox="1384 213 1912 279">Description</th> <th data-bbox="1912 213 2029 279">Marks</th> </tr> </thead> <tbody> <tr> <td data-bbox="1267 279 1384 852" style="text-align: center; vertical-align: top;">3</td> <td data-bbox="1384 279 1912 852">A reasoned discussion which accurately examines both sides of the economic argument, making use of economic information and clear and logical analysis to evaluate economic issues and situations. One side of the argument may have more depth than the other, but overall both sides of the argument are considered and developed. There is thoughtful evaluation of economic concepts, terminology, information and/or data appropriate to the question. The discussion may also point out the possible uncertainties of alternative decisions and outcomes.</td> <td data-bbox="1912 279 2029 852" style="text-align: center; vertical-align: top;">6–8</td> </tr> <tr> <td data-bbox="1267 852 1384 1190" style="text-align: center; vertical-align: top;">2</td> <td data-bbox="1384 852 1912 1190">A reasoned discussion which makes use of economic information and clear analysis to evaluate economic issues and situations. The answer may lack some depth and development may be one-sided. There is relevant use of economic concepts, terminology, information and data appropriate to the question.</td> <td data-bbox="1912 852 2029 1190" style="text-align: center; vertical-align: top;">3–5</td> </tr> <tr> <td data-bbox="1267 1190 1384 1390" style="text-align: center; vertical-align: top;">1</td> <td data-bbox="1384 1190 1912 1390">There is a simple attempt at using economic definitions and terminology. Some reference may be made to economic theory, with occasional understanding.</td> <td data-bbox="1912 1190 2029 1390" style="text-align: center; vertical-align: top;">1–2</td> </tr> </tbody> </table>	Level	Description	Marks	3	A reasoned discussion which accurately examines both sides of the economic argument, making use of economic information and clear and logical analysis to evaluate economic issues and situations. One side of the argument may have more depth than the other, but overall both sides of the argument are considered and developed. There is thoughtful evaluation of economic concepts, terminology, information and/or data appropriate to the question.
