www.papacambridge.com MARK SCHEME for the May/June 2011 question paper

for the guidance of teachers

2217 GEOGRAPHY

2217/13 Paper 1 (Geographical Themes), maximum raw mark 75

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2	Mark Scheme: Teachers' version	Syllabus	· A
	GCE O LEVEL – May/June 2011	2217	The second

The features of the marking scheme

Each guestion carries 25 marks. Candidates cannot earn above the maximum marks available each sub section.

Cambridge.com The marking scheme attempts to give guidance about the requirements of each answer and lists a number of responses which will earn marks along with the general principles to be applied when marking each question.

It should be noted that candidates can earn marks if their answers are phrased differently provided they convey the same meaning as those in the mark scheme. THE CANDIDATES DO NOT NEED TO USE THE SAME WORDING TO EARN MARKS.

The notation `etc.` at the end of an answer in the mark scheme signifies that there may well be other correct responses or examples that can be given credit. Providing the statement is true, relevant to the question asked and not repetition of a previous point made credit should be given.

A point made within one sub-section which is an answer to the question set in a different sub-section should not be given credit as each sub-section asks different questions which require independent answers.

The mark scheme uses semi colons (;) to separate marks and diagonals to separate alternative answers.

Levels of response marking is used for section (c) of each question.

Thus it is the quality of the response which determines which level an answer achieves rather than the quantity of statements contained within it. However once assigned to a level the mark achieved within that level is determined by the number of points made.

Levels 1 and 2 are distinguished by whether statements are simple (level 1) or developed/elaborated (level 2). A candidate can immediately enter L2 by making developed points without making any L1 statements. In order to achieve L3 a candidate must have already reached the top end of L2 - in addition his/her answer should have a clear example (for 6 marks), and if the answer is place specific as well (7 marks).

Where statements are assigned levels by the examiner this should be indicated by the use of L1, L2 and L3 next to the statements. A summary of the overall level and mark awarded should be written at the end of the answer.

Summary:

Level 1 (1 to 3 marks): 1 simple statement (1 mark) 2 simple statements (2 marks) 3 simple statements (3 marks)

Level 2 (4 to 6 marks): 1 developed statement (4 marks) 2 developed statements (5 marks) 3 or more developed statements with e.g. (6 marks)

No example/inappropriate example = MAX 5 marks

Level 3 (7 marks)

3 or more developed statements + named example with at least one piece of place specific detail.

	5@	1 mark or development		[5]

<u>Level 1</u> (1–3 marks) Statements which identify pull factors in limited detail. (e.g. jobs, good services, food, education, safety etc.)

Level 2 (4–6 marks)

Uses named example

More developed statements which explain reasons for international migration.

(e.g. jobs in formal sector/ where they can work in service sector/factories, greater access to schools/hospitals/clinics, can buy food from shops rather than rely on unproductive farmland etc.)

(NB MAX 5 if no named example)

Level 3 (7 marks)

Uses named example (e.g. Germany).

Comprehensive and accurate statements including some place specific reference.

(e.g. people were employed in rebuilding cities like Dresden after World War 2, good access to schools/hospitals/clinics in large urban area like Cologne, they do not have to produce food as supplies are imported etc.) [7]

	GCE O LEVEL – May/June 2011	2217 23	

Level 1 (1–3 marks)

Cambridge.com Statements including limited detail describing causes and/or effects of drought or tropic storms.

(e.g. low pressure over sea, people killed, crops destroyed, they have no water to drink, houses damaged, people have to evacuate, roads flooded/blocked etc.)

Level 2 (4–6 marks)

Uses named example.

More developed statements describing causes and/or effects of drought or tropical storms. (e.g. low pressure formed over warm sea areas, people have to walk long distances to find fresh water; damage to crops leads to lack of food; death through starvation/ malnutrition/drowning etc.;

housing destroyed by strong winds; people have to evacuate and live in refugee camps; roads flooded/blocked so aid cannot be sent in etc.)

(NB MAX 5 if no example)

Level 3 (7 marks)

Uses named example (e.g. Cyclones in Bangladesh).

Comprehensive and accurate statements describing causes and effects of drought or tropical storms including some place specific reference.

(e.g. low pressure formed over warm Bay of Bengal; people have to walk long distances to find fresh water as local groundwater sources are flooded by the Ganges; damage to rice crops leads to lack of food; death through starvation/malnutrition/drowning etc.; housing destroyed by strong winds sweeping in from Bay of Bengal; people have to evacuate and live in refugee camps in Dhaka, roads flooded/blocked so aid cannot be sent in etc.) [7]

Level 1 (1-3 marks)

5 @ 1 mark or development

Statements including limited detail describing what can be done to reduce flooding. (e.g. build higher banks, plant trees in drainage basin, build dams/reservoirs along course of river, straighten river etc.)

Level 2 (4–6 marks)

Uses named example.

More developed statements describing what can be done to reduce flooding.

(e.g. build higher banks so the river will have a greater capacity; raise banks especially in areas where river flows at a higher level than flood plain; plant trees so flow will not be so flashy/so less water will get to river as more evapo-transpiration occurs; build dams to regulate flow of water; straighten river so water is removed from drainage basin more quickly etc.)

(NB MAX 5 marks if no named example)

Level 3 (7 marks)

Uses named example (e.g. River Mississippi).

Comprehensive and accurate statements including some place specific reference.

(e.g. built high levees so the river will have a greater capacity; raised banks protecting cities like Memphis where river flows at a higher level than flood plain; planting trees in Tennessee Valley so flow will not be so flashy/so less water will get to river as more evapo-transpiration occurs; much straightening of river/meanders cut off between New Orleans and Memphis etc.) [7]

	GCE O LEVEL – May/June 2011	2217	Da

Level 1 (1–3 marks)

Cambridge.com Statements including limited detail explaining location of manufacturing/processing industry (e.g. large workforce; good transport links; cheap land; raw materials; energy supply; water supply etc.)

Level 2 (4–6 marks)

Uses named example

More developed statements explaining location of manufacturing/processing industry (e.g. large workforce with engineering skills; good rail links to raw material supplies; located on coalfield for energy supply; water supply to use in processing etc.)

(NB MAX 5 marks if no named example)

Level 3 (7 marks)

Uses named example (e.g. sugar refining in Baltimore USA) Comprehensive and accurate statements including some place specific reference.

(e.g. good motorway links to markets in large cities such as New York and Washington; adjacent port facilities for import of sugar cane from Caribbean; government grants due to investment in declining industrial areas; large areas of flat land adjacent to waterside for storage of raw cane; large workforce in urban area which has high unemployment rate due to recent industrial decline etc.) [7]
