UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS **GCE Ordinary Level**

www.papacambridge.com MARK SCHEME for the May/June 2009 question paper

for the guidance of teachers

5054 PHYSICS

5054/04

Paper 4 (Alternative to Practical), maximum raw mark 30

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2009 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

General Points

Lists:

Correct responses gain a mark; incorrect (NOT) responses lose a mark. Lowest mark zero.

NB: Some comments can be ignored. These will be indicated in the marking scheme.

Observer:

When asked to draw in the position of an observer in an experiment:

- the eye should be on an approximately horizontal line with the reading
- may be \bullet , E, x, \odot or optics eye looking towards reading •

Parallax error:

A common answer to practical errors is parallax error. Read the instructions carefully for each answer as the detail required in each response will vary.

- just stating 'parallax error' maybe acceptable in some instances; check mark scheme •
- stating the measuring instrument may be required, e.g. in reading the thermometer •
- correct explanations of parallax error are acceptable alternatives, •
- e.g. the line of sight must be perpendicular to the scale •
- incorrect explanations of parallax error are marked incorrect,
- e.g. the eye is perpendicular to the reading/meniscus .

Error Carry Forward (e.c.f.):

This applies in all calculations so one mistake is not penalised in later parts of the question. It is indicated by e.c.f. in mark scheme.

There is usually no e.c.f. within a single calculation.

Significant Figures (s.f.):

In calculations, candidates are penalised for incorrect s.f. when asked to give answers to a suitable number of s.f. When measuring or reading from a diagram candidates must give answers to a suitable number of s.f. A common error here is to give too few s.f. e.g. when a measurement is 13.0 cm and the candidate quotes 13 cm.

Graphs:

- labelled both quantity and unit Axes: labels and quantities to be on correct axes
- Scales: must fill at least 1/2 grid in both directions i.e. cannot be doubled must be 'sensible', i.e. not multiples of 3, 7 etc. should follow instructions, e.g. start from the origin should have at least three values marked
- Points: allow x, \bullet or \odot (dot maximum size 1 mm diameter i.e. $\frac{1}{2}$ small square) must be accurately plotted to $\pm \frac{1}{2}$ small square not awarded if scale not sensible
- Line: attempt at single smooth line:

curves need not be perfect!

- straight lines - must be drawn with a ruler
 - must be best fit i.e. equal number of points above and below line
 - must not be skewed, i.e. not points at start/end all above/below the line

	GCE O LEVEL – May/June 2009	5054 23
Awarding All marking	Marks points are called B, M, C or A marks.	ambride
B ma A ma C ma	arks are independent of other marking points. arks are answer marks. If awarded all preceding C ma arks are compensation marks. If the final answer (A m arks may be awarded for correct working seen	rks are automatically given. hark) is not awarded the preceding C

Awarding Marks

- marks are independent of other marking points. В
- marks are answer marks. If awarded all preceding C marks are automatically given. Α
- marks are compensation marks. If the final answer (A mark) is not awarded the preceding C С marks may be awarded for correct working seen.
- Μ marks must be awarded for any subsequent A marks to be awarded.
- e.c.f. error carry forward
- correct answer only c.a.o.
